

# 2015-2017

## Sustainability Policy

**As a leading global tertiary organisation we will contribute to a sustainable future through our leadership in education for sustainability, corporate accountability and social responsibility.**

We will:

- Provide sustainable facilities and grounds that can be used as living laboratories for sustainable education by preserving natural vegetation and providing aesthetic spaces for enjoyment, and offering opportunities for experiential learning.
- Maximise operational performance by continually improving our waste management, energy and water use, and reducing our ecological and carbon footprint.
- Invest in educational innovation and excellence.
- Empower our customers to think critically about the impact their decisions and actions have in creating a prosperous and sustainable society.
- Strive to value the caring for country of the Guringai people, the original owners of the land where we teach, learn and work.
- Expand our horizons and create our future by giving a voice to our customers, building staff capability and business partnerships, and engaging our community in lifelong learning for a sustainable future.
- Meet all the applicable legal requirements and other requirements, and prevent pollution.

**Alison Wood**

Regional General Manager  
TAFE NSW Sydney Region

May 2015

This vision and commitment is publicised on TAFE NSW Northern Sydney website, InfoPoint and is demonstrated through the stories of our staff and customers.
