Certificate III in Automotive Technology
Motor Mechanics generally achieve their qualification as an apprentice. You will be employed to work alongside a tradesperson and attend classes at the Northern Sydney Institute. A mechanic’s work primarily involves maintaining, servicing, repairing and overhauling motor car mechanical and electrical systems and components. It may also involve exhaust system repair and fabrication and air conditioning service and repair. Apprenticeships usually take three years to complete.
Employment options: motor mechanic, automotive electrician, automotive service mechanic

Certificate II in Automotive (Light Vehicle)
You will learn basic skills and knowledge required to service automotive mechanical and electrical systems. To start a career in the automotive industry you can enrol in this qualification
Employment options: automotive mechanic apprenticeship

Certificate I in Automotive
With the relevant industrial or simulated industrial practical experiences, you will gain the knowledge and skills required to perform minor service and preparatory work under close supervision in areas of the automotive industry.
Employment options: automotive apprenticeship

Automotive Statement of Attainment (Pre-vocational)
This course aims to provide students with the underpinning knowledge and skills to allow them to gain entry into the Automotive Mechanical sector of the industry as an apprentice or trainee.
Employment options: automotive mechanic apprenticeship
