Connecting an iPad or an iPhone to the College Wireless Network

1. Open settings
2. Open Wi-Fi and turn it on
3. Let the device locate the available wireless networks
4. Select **detguest** and tap on the arrow.
5. Let the device fill in the information as shown in the screen dump. **IP addresses etc will not match the information as shown. This is OK.**
6. Type your DEC user name in the client ID box e.g.  john.citizen13
7. Set the HTTP Proxy to Manual and fill in the server and port info as shown
8. Turn authentication on and fill in your DEC User name and password
9. Close the Wi-Fi
10. Open Safari and check if you have a connection. It may take a moment and you will be prompted to enter your username and password.
